- (Warm-up Poll) To what extent does the current RES framework align with your sense about what a successful RES does?
- (Discussion) Think about the places you have identified where the current statute is in tension with your goals for the RES. What immediately comes to mind? In other words, where are the places you think the legislature should put its attention for reform?
- (Discussion) Let's shift attention directly to Task 1 in Act 33 of 2023. One of the "homework" items between the first meeting on September 6<sup>th</sup> and today was to make a list of potential changes to Vermont's existing renewable energy requirements, or other energy policies, that are needed to increase grid stability, resiliency, modernization, and reliability. Are these items captured here? If not, let's take a moment to add them.
