Renewable Energy Standard Reform Working Group
Date Submitted: November 13, 2023

To the Renewable Energy Standard working group:

I support moving VT to 100% renewable energy that comes from new wind and solar and storage and not old resources like large hydro or biomass. I want us to prioritize electricity sources that don't export harms of energy production to other communities and actually reduce our carbon emissions—this means wind and solar.

Respectfully,
Cecily Anderson
