

Medicaid ACO Contract and All Payer Model

Three Key Points from Act 113 of 2016:

1. The All Payer Model (APM) is intended to maximize alignment between Medicare, Medicaid, and commercial payers to the extent permitted under federal law and waivers from federal law.
2. Beginning in 2018, ACOs participating in any payment reform program or initiative, including APM, shall obtain and maintain certification by the GMCB.
3. On or before December 31, 2016, the GMCB shall review any all-inclusive population-based payment arrangement between the Department of Vermont Health Access and an accountable care organization for calendar year 2017.
