Jim Reardon, Commissioner

MEMORANDUM

TO: Joint Fiscal Committee
FROM: Jim Reardon, Commissioner of Finance & Management
DATE: July 15, 2013
RE: Excess Receipts Report – 32 VSA Sec 511

In accordance with 32 VSA Sec 511, please find attached the report on Excess Receipts approved for expenditure during the fourth quarter (cumulative) of FY 2013 (7/1/2012 through 6/30/13). The full text of the governing statute is provided at the end of this memo.

Review Process

The Administration goes through an extensive application and approval process for allowing expenditure of excess receipts. The form required of departments can be found at: http://finance.vermont.gov/sites/finance/files/pdf/forms/budget/Excess_Receipts_Form.doc (at <http://finance.vermont.gov/forms> under the “Budget” category). The form requires information to ensure that the approval does not overstep statutory guidelines. Requests that overstep the statutory guidelines are denied, and/or where appropriate are held for the legislative budget process.

Departments are required to provide written answers to the following questions (although only the response to the first question is entered into the VISION database):

- Reason funds are available?
- Do you anticipate additional funds from the same source available in this fiscal year and above current appropriation?
- Is this increase one-time or at an ongoing level?
- Why were funds not fully budgeted during budget development?
 - What is the current year appropriation or grant amount approved by the Joint Fiscal Committee for this fiscal year, from this source of funds for this purpose?
- If these are ongoing funds, will funds from this source be fully budgeted and appropriated next fiscal year?
- Were excess receipts requested from this source in the preceding two fiscal years? If so, explain why they were not budgeted?
- Are these excess receipts being received from another department (i.e., interdepartmental transfers)? If so, are they appropriated in that department or will excess receipts be required there as well?

- Relationship, if any, to the Budget Adjustment Act?
- Can excess receipts be used to reduce the expenditure of State funds?
- **Will excess receipts establish or increase the scope of a program, committing the State at any time to expend State funds?** [The form notes that in such instances, legislative approval is required.]
- What specifically will excess receipts be used for? What is the impact on programs if this excess receipt request is not approved?
- Are any of the excess receipts to be used for your department's administrative, staff or operating expenses? If so, explain.
- Is there any matching fund requirement due to excess receipts? If so, where is the match found in your budget?
- If excess receipts are earned federal receipts, is excess receipt being spent in the same (federal) program where the excess receipts are earned? If not, explain.
- Has the excess receipt been received and deposited? If no, what date are funds expected?
- If approved, when will the expenditure of this excess receipt first occur?

The VISION entry normally includes only the response to the first question – why are additional receipts available? However, for any individual Excess Receipt Request, we can provide the full paper copy of the form, listing all the department's responses.

Broad Categories of Excess Receipt Requests

Requests for expenditure of excess receipts generally fall into several broad categories:

Interdepartmental Transfers: It is not uncommon for one State department (“Department A”) to purchase services from another State department (“Department B”). In that instance, Department A budgets these expenditures just as they would any other type of expenditure: by type of expenditure and by the source of revenue that will fund these expenditures. Department B also budgets these expenditures, and identifies the source of revenue as “interdepartmental transfers.” This process results in a small amount of “double-booking” of spending authority but ensures that both departments have the necessary spending authority. In many cases, at the time of budget development, Department A has not yet decided from where to purchase the services in question, so Department B does not budget the interdepartmental transfer revenues. When Department A moves forward to contract for services with Department B after the budget has closed, then Department B must request an Excess Receipts approval for the additional spending authority to perform the services.

Federal Funds: Departments estimate their likely federal receipts in the fall for the upcoming budget year, meaning the estimate is as much as nine-months old at the start of the budget year, and another 12 months older by the end of the budgeted fiscal year. As a result, more recent developments may mean that the budgeted federal spending authority is insufficient, either because the current federal award for an existing grant has been increased, or there is spending authority from grants from earlier federal fiscal years that can be used in the current year. Additionally, extraordinary events – such as the federal American Recovery and Reinvestment Act (ARRA) or federal aid to Vermont due to Tropical Storm Irene – may cause large – and unanticipated -- spikes in federal receipts.

Other: There are over 200 different special funds created under State law, in which are deposited fees, user charges, penalties, specified taxes, etc. Departments estimate how much they will collect each year for each of these special funds, and base their spending plans accordingly. However, for the same reasons noted above, the actual collections for these revenues may be higher than the original budget. Excess receipts may also be used in an instance where prior-year special fund spending authority was not utilized and needs to be created again in the subsequent year (similar to a carry-forward). It should be noted that in addition to the restrictions in the excess receipts statute, each special fund has its own statutory restrictions that prevent the funds being used for other than their intended purposes and programs.

Attached Report:

The attached report is a cumulative list of approved excess receipt requests for the current fiscal year. It includes ALL the data entered in VISION for that transaction, including:

- Agency/Department name
- Appropriation name and “DeptID”
- Transaction date
- Fund source – name and fund number
- Amount
- Comments in response to question: “Why are funds available?” (VISION allows for a limited number of characters per cell entry.)

The data are sorted into the three broad categories of requests discussed above.

Governing Statute:

32 V.S.A. § 511. EXCESS RECEIPTS

If any receipts including federal receipts exceed the appropriated amounts, the receipts may be allocated and expended on the approval of the commissioner of finance and management. If, however, the expenditure of those receipts will establish or increase the scope of the program, which establishment or increase will at any time commit the state to the expenditure of state funds, they may only be expended upon the approval of the legislature. Excess federal receipts, whenever possible, shall be utilized to reduce the expenditure of state funds. The commissioner of finance and management shall report to the joint fiscal committee quarterly with a cumulative list and explanation of the allocation and expenditure of such excess receipts.
